## 1 Business Solution

### 1.1 Business Domain View

#### 1.1.1 Problem Statement / Business Need

(As part of the trade of goods and services process, situations may arise when adjustments are necessary to reflect the actual flow, price, receipt or other agreements for the use of goods and services between trading parties. Situations such as (but not limited to):

- goods being received damaged
- incorrect quantity of goods are received
- retroactive volume discounts

result in the need for one party to notify the other trading party that an adjustment is being applied, resulting in a change to the monetary amount owed/due between the parties.

The goal of this 'Debit Or Credit Advice' use case is to provide an electronic advice to a trading partner that a monetary adjustment - debit or credit amount value - is being applied to the purchase of goods or services.

#### 1.1.2 Objective

*To supply the detail design of the Debit or Credit Advice business transaction needed to meet the requirements of the referenced BRAD(s).*

#### 1.1.3 Audience

The audience of the standards would be any participant in the global supply chain. This would include retailers, manufacturers, service providers, and other third parties.

#### 1.1.4 Artefacts
